<b>Academic status:</b>	Associate Professor	
<p>The aim of the course is to present folk music traditions in the Carpathian basin through the peasant way of life, regional characteristics and historical aspects. Besides the genres of vocal folk music students learn about the presentation techniques, stylistic layers and instruments of instrumental folk music. They get to know the relationship between Hungarian folk music and that of the neighbouring peoples as well as the traditional relationship between artistic music and folk music.</p> <p>Furthermore, the subjects aim at acquainting students with the functions, forms, historical layering of Hungarian folk music so that they are able to place it within the culture of peoples in the Carpathian Basin. They will study folk music functionally, as a part of a continually changing culture. Students get to know the characteristics of every region and genre by original sound recordings: they will learn folk songs that represent a certain genre and/or region.</p> <p>Throughout the course, the instructor (a qualified cultural anthropologist and a distinguished folk singer) will point out how vocal and instrumental folk music genres function(ed) as forms of communication in the wider frame of traditional folk culture in Hungary.</p>
