<p>Course Description: The course is aimed for Hungarian major students (at a university outside Hungary) whose first language is other than Hungarian. The course is to assist students in continuing their language studies in the target country and in gaining more and more linguistic experience. The main focus is communication, students need to accomplish communicative “mini-projects” that every student can do at their own language level. The classes prepare students for the tasks and also provide an opportunity for reflexion. Examples for such mini-projects are: an interview with a native speaker of Hungarian (on a topic chosen by the students), making a presentation (on a topic chosen by the students), writing a blog post (on a topic chosen by the students), making a glossary of the most important vocabulary items on a topics chosen by the students etc. Discussions of different topics with the use of articles, short videos, songs etc. are also integral parts of the course. On top of these, the course can serve the students’ needs by providing a brief question-and-answer session at the beginning of each class where questions brought by the students can be discussed (questions concerning Hungarian vocabulary items, grammatical phenomena and language use that might need clarification for any reason). The language of instruction is Hungarian.</p>
