

<i>Title and Code of Course:</i> Research Seminar in English Linguistics, ERPB-BAN 3181			
<i>Instructor's Name:</i> Réka Hajner			
<i>Instructor's Email Address:</i> hajner.reka@kre.hu			
Credit Point Value: 6	Number of Lessons per Week: 2	Type of Course: Seminar ☒ Lecture ☐	Method of Evaluation: Oral Examination ☐ In-Class Presentation ☐ Other ☒
Course Description: This seminar introduces students to the principles and practices of research methodology in linguistics and applied linguistics. The course provides hands-on experience with research design, data collection, questionnaire construction and experimental methods. Students will also develop a basic understanding of statistics, descriptive data analysis, and practice academic writing, with special emphasis on writing the methodology section of their thesis. By the end of the semester, students will be able to design small-scale research projects, critically evaluate existing studies, and report their findings in an academically appropriate format.
