

### *Postgraduate Training as a Drawing Consultant*

The aim of the training is to provide a high level, scientifically based, professional knowledge of drawing analysis, especially for professionals working in the field of visual expression (children's drawings, adult visual works) or involved in the education and training of the growing generation. A professional with knowledge of drawing analysis can work in any field, organisation, institution or establishment where education, development, training, re-education, correction, remediation and rehabilitation activities are carried out and in which professionals use human intervention in their work.
